Empathy Map

SAYS • i dont "I don't know which crop is best for my soil this season." • I wish I could just upload a leaf photo and know the disease • ferilizer is expensive — I need to know exactly what to use. • "I want to see the weather data fill in automatically."	THINKS • Worries that the wrong crop choice will cause financial loss. • Wonders if an AI tool can really help a small farmer like them. • Thinks precision farming is only for largebusinesses. • Hopes for a simple tool that works on a basic smartphone.
	Raman (Farmer)
DOES • Asks neighbours or local traders for crop advice eachseason. • Enters N, P, K and climate values into the OptiCrop recommend page. • Uploads a leaf photo to the disease detection page. • Checks the real-time weather widget to auto-fill temperature and humidity. • Explores the research analytics dashboard to compare crop patterns.	FEELS • Relieved when the tool recommends a crop with a confidence score. • Confident after seeing the fertilizer guidance for the recommended crop • Curious about the analytics dashboard showing crop-environment patterns - Empowered to make data-backed decisions without needing an agronomist
