

Project Demo Planning

Date	04 July 2026
Team ID	ramanharshitha2005@gmail.com
Project Name	OptiCrop - Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)
1	Introduction & Problem Statement	Briefly introduce OptiCrop and the agricultural problem it solves. Show statistics on crop losses due to wrong crop selection and undetected plant diseases in India. Explain the three scenarios.	3 mins
2	Solution Overview	Explain the OptiCrop architecture: Python HTTP server, ML models (RF+DT+SVC ensemble), Open-Meteo weather, Chart.js analytics. Walk through the project folder structure and README.	2 mins
3	Live Demo — Crop Recommendation (Scenario 1)	Open http://127.0.0.1:8000/recommend.html . Enter N=90, P=42, K=43, temp=20, humidity=82, pH=6.5, rainfall=202. Show predicted crop (rice), confidence score, candidate crops list, and fertilizer advice.	3 mins
4	Live Demo — Crop Suitability (Scenario 2)	Switch to Scenario 2 tab. Select Mango, enter low temperature (5°C). Show Poor suitability score, per-metric breakdown, and remediation steps.	2 mins
5	Live Demo — Disease Detection	Open disease.html . Select Tomato, enter symptoms and environment → show disease prediction. Then upload a leaf image → show image-based disease classification.	3 mins
6	Live Demo — Weather Auto-fill	On the recommend page, enter 'Nellore' in the city field and click Fetch Weather. Show temperature, humidity, and rainfall auto-filled from Open-Meteo API.	1 min
7	Live Demo — Research Dashboard (Scenario 3)	Open insights.html . Show Chart.js bar chart (avg nutrients by crop), radar chart, and scatter plot. Filter by Rice + Kharif season. Export filtered data as CSV.	3 mins
8	Q&A; Session	Answer evaluator questions on technical choices, model accuracy, dataset details, scalability, and future roadmap.	3 mins

Demo Flow Summary:

Step	Activity	Notes	Responsible Member
1	Introduction & Problem Statement	Show crop loss statistics; explain 3 OptiCrop scenarios	Raman Harshitha
2	Solution Overview	Architecture walkthrough + project folder structure	Raman Harshitha
3	Live Feature Demonstration	All 8 features demonstrated live on local server	Raman Harshitha

4	Q&A; Session	Technical and business questions from evaluator	Raman Harshitha
